

TOOL & SOCKET SETS, SOCKETS & SOCKET ACCESSORIES TIPS

- Do not use sockets or accessories with worn drives
- Do not use sockets with worn or rounded internal serrations or sockets with cracked walls
- Do not use standard sockets on impact tools
- Do not use spanners that are cracked, rounded, worn or sprung
- Do not use ring spanners with cracked rings or worn and rounded internal serrations
- Never use a pipe or other wrench to gain extra leverage
- A spanner is a spanner – never use it as a hammer
- Do not mix thread systems - that is, don't use a A/F socket on a Metric nut or bolt
- Use safety goggles – serious eye injury is possible
- Do not use extenders or cheater bars
- Pull towards you – do not push
- Maintain your balance
- Prevent slipping – keep tools clean
